

**IN THE SPECIFICATION:**

The headings were previously submitted in the Preliminary Amendment and the Applicant respectfully requests that the Examiner review the Preliminary Amendment. There are additional amendments to the specification, included with the insertion of the proper headings.

Please insert the following new heading before line 1 of page 1:

**BACKGROUND OF THE INVENION**

Please insert the following new heading before line 1 of page 3:

**SUMMARY OF THE INVENTION**

Please insert the following new heading before line 5 of page 5:

**BRIEF DESCRIPTION OF THE DRAWINGS**

Please insert the following heading before line 13 of page 5:

**DETAILED DESCRIPTION OF THE INVENTION**

Please amend the following paragraph on page 5, line 9:

Fig. 1 is an elevation of a radiant electric heating element made in accordance with the invention;

[and] Fig. 2 is a cross-section, taken on line II-II of Fig. 1;and

Fig. 3 is a cross-section view of an arrangement of multiple radiant electric heating elements.

By placing a pair of radiant electric heating elements according to the invention back-to-back slices of toast may be introduced between them, preferably on supporting means (10), so that both sides are toasted simultaneously, and by providing three such elements, as shown in Fig. 3, two or more slices may be toasted at once.

Please amend the following paragraph on page 7, line 7:

If required, means may be provided (18) for effecting relative movement of the several heating elements towards and away from each other thus, selectively, to open or close the gap between the elements and thus the distance therefrom the slices of bread.

Please insert the following paragraph on page 7, line 12:

An infrared emitter-receiver scanning detector (14) can act in a browning sensor (12).  
An infrared beam acts on the material being toasted to monitor any change in colour. The difference in the final colour of the material to be toasted is set by auto-zeroing means (16) at each toasting process.
